

Lighting Software Cheat Sheet

Basic Control

This software controls channels by sending each DMX Address a value between 0 and 255.

To Control channels, in "MAIN:" press

```
[channel number][parameter][AT][value][enter]
```

To assign send a value to a parameter

This software has a few different pages. These are

- main (used to control channels and access other menus)
- playback (used to record, playback and view cues)
- patch (add additional fixtures and view currently patched channels)
- settings (view credits and change level)

To access these pages, type each word into the main command line

To return to main page, type "back"

Please feel free to explore this software and if you are curious about how it was built and want to download it for yourself, please scan the QR Code on the didactic.

Recording and playing back Cues

This software allows for users to record cues and play them back. To record a cue press;

```
[playback][enter][record][cue number][enter]
```

To play back a cue press:

```
[playback][enter][record][cue number][enter]
```
